INTELLIFLO IN UK'S TOP-100 FASTEST-GROWING PRIVATE COMPANIES

Leading financial services software provider, IntelliFlo is delighted to announce that it has been named as one of the UK's fastest-growing private companies in *Real Business* magazine's **HOT 100** list.

IntelliFlo was placed 52nd out of the 100 privately-owned companies. The annual league table – published this month – looks at companies' compound annual growth rates over the past four years and offers an interesting glimpse into the kinds of businesses that will shape Britain's "new economy" – which include a number of environmental and alternative-energy firms.

IntelliFlo's user base has increased from 26 in 2004, when the company was launched, to over 6,000 in 2009. Sales have grown 64 per cent a year from an annualised £1.1 million in 2006 to £5.9 million in 2009.

IntelliFlo Chief Executive, Nick Eatock commented, "We're absolutely delighted to appear in the *Real Business* magazine's **HOT 100** list - especially entering for the first time at number 52. We have had a fantastic year with growing numbers of users and sales. We have also won some prestigious clients and attracted a number of highly experienced and talented individuals to the IntelliFlo team. With the impending changes to the intermediary regulatory sector, we expect an influx of new clients keen to use technology as a means of running their businesses more efficiently and ultimately more profitably. We are also moving further into the multi channel product provider space, though the IFA sector does remain at the heart of IntelliFlo's business. We are very proud of our web-based technology and strive to maintain our position as the most innovate and customer-focussed solution in the market place."
